

LifeNet-Network for Mutual Inspiration between Earth and Humanity

**Meditation of the Month June 20th 2018 – July 20th 2018 – Proposed by
Marko Pogačnik and LifeNet**

TO SUPPORT NETWORKING

At the threshold of the 21st millennium representatives of different groups doing geomantic work in different countries met at Šempas, Slovenia, to create a non-institutional network called LifeNet or Lebensnetz.

Since at that time we were already aware that the Earth is moving through deep changes, transforming the geomantic body of the planet, we decided to use the subtitle "Geomancy and Transformation". The second subtitle is written above.

In 2008 the Slovenian VITAAA group has organized the first international meeting of LifeNet groups. Since then such an international creative meeting finds place every second year in a different country. After Slovenia it was organized in Germany then in England, Sweden, Croatia and this year again in Germany, this time at the lake Constance from June 20th to 23rd.

A second way to keep the LifeNet alive is the Monthly Meditation created by Marko Pogačnik in English and translated into German by Martin Krausch – there are others to translate it from English or German into other languages. Thank you all!

- The proposal for the meditation this time is to support those networks and individuals that are in different ways working together with Gaia towards co-creating the Earth as a planet of peace and co-existence between all beings that constitute the Earthly Cosmos.
- The proposal is to find your own way how to weave (within you!) different networks together and support their creative input.
- To support their inner strength and stability you can engage your dragon powers that are present in the underworld of your belly leading them into creative action through the inter-dimensional portal of your heart.
